Abstract

i didn't eat any breakfast cause I woke up late

1 things i kinda liked

- I liked how I learned to use IDL to analyze images
- I liked how the instructors were always really professional
- I liked how my final project worked

2 things i didn't like

1. IDL has terrible syntax
2. github sucks

3 some math

$$\sum_{j=0}^n (-1)^j \partial_{\mu_1 \dots \mu_j}^j \left(\frac{\partial \mathcal{L}}{\partial f_{i, \mu_1 \dots \mu_j}} \right) = 0$$

My grandma's pasta and meatballs Fried Chicken from Martins Idk like my mom's oreo fudge cheesecake	Brand New Dear and the Headlights Manchester Orchestra	exit n elements() mrdfits()
---	--	-----------------------------------

4 some crappy picture
